SUBJECT INDEX, VOLUME XXXVIII

Acrylamide, polymerization of, 393
Alfin catalysts, from cycloalkenes, 19
N-Alkyl maleamic acids, copolymerization with *N*-alkyl maleimides, 241
Anionic polymerization, isoprene, 205
Branching, in polydisperse polymers, 403
Butadiene, polymerization with styrene, 7
ε-Caprolactam, rate of formation, 265
Catalysts, from cycloalkenes, 19
  effect of composition and structure on butadiene-styrene polymerization, 7
  low pressure polyethylene, 51
  molybdena-alumina, 91
  Ziegler-type, for oligomerization of 1,3-diolefines, 45
Cetyl pyridinium hyaluronate, flow studies, 319
Copolymerization equilibrium, 269
Copper, coordination polymers of, 261
Crystallinity, effect on viscoelastic properties of polyethylene, 471
  of polypropylene, 545
Crystallization, effect on infrared spectrum of polyethylene terephthalate, 479
  of isotactic polypropylene, kinetics, 33
Cycloalkenes, alfin catalysts from, 19
Degradation, chain-end activated, 157, 179
Diffusion, cetyl pyridinium hyaluronate, 319
1,3-Diolefines, oligomerization, 45
Endgroups, in tetrafluoroethylene, 289
Ethylene, kinetics of radical polymerization, 247, 459
  polymerization, 91
Formaldehyde-phenol polymers, 513
Fractionation, chromatographic, for molecular weight distribution of near monodisperse polymers, 552
Free radicals, in γ-irradiated polymethyl methacrylate, 451
Homopinic acid, in interpolyesters, 307
Infrared, for determination of polypropylene crystallinity, 545
Infrared spectrum, polyethylene terephthalate, 479, 497
Initiators, of acrylamide polymerization, 393
  for crystalline polystyrene, 259
Interpolyesters, with pinic and homopinic acids, 307
Intrinsic viscosity, polyisobutylene, 539
Irradiation, and free radicals in polymethyl methacrylate, 451
  for grafting of methyl methacrylate to polyalkyl methacrylates, 417
  polyalkyl methacrylates, 209
  polyethylenes, melting characteristics of, 369
Isoprene, anionic polymerization, 205
  dimers of, 229
Kinetics, crystallization of isotactic polypropylene, 33
  ethylene polymerization, 91
  isotactic polypropylene, 107
  radical polymerization of ethylene, 247, 459
Light scattering, flowing flexible macromolecules, 117
Melt viscosity, polyethylenes, 381
Methyl methacrylate, grafting to polyalkyl methacrylates, 417
Molecular weight distribution, near monodisperse polymers, 552
  polydisperse systems, 343
Nitrogen-containing monomers, 241
Non-electrolyte solutions, thermodynamic behavior, 329
Nuclear spin resonance spectroscopy, 73
Oligomerization, 1,3-diolefins, 45
Organosodium reagents, for butadiene-styrene polymerization, 7
Phenol-formaldehyde polymers, 513
Photolysis, polyethylene terephthalate, 357
Pinic acid, in interpolyesters, 307
Polyacrylamide, branch formation in, 133
Polyalkyl methacrylates, γ-irradiation, 209
  grafting with methyl methacrylate, 417
Poly(*tert*-butyl acrylate), 63
trans-1,4-Poly-(2,3-dimethyl-1,3-butadiene), 272
Polydisperse polymers, branching in, 403
Polydisperse systems, molecular weight distribution, 343
Polyelectrolytes, colligative properties, 213
Polyester resins, polymerization with triallyl cyanurate, 433
Polyethylenes, liquid spreading on films of, 297
  low pressure, catalysts, 51
  low-pressure and irradiated, melting characteristics, 369
  melt viscosity, 381
  spherulites in, 141
  viscoelastic properties, 471
Polyethylene terephthalate, infrared spectrum, 479, 497
  photolysis, 357
Poly-1-hexene, effect of ionizing radiation on, 275
Polyhydrocarbons, heat and entropy of fusion, 549
Polyisobutyl vinyl ether, crystalline, 554
Polyisobutylene, intrinsic viscosity, 539
Polyisoprene, isomerization in, 521, 533
Polymethyl methacrylate, γ-irradiated, free radicals in, 451
Poly-1-pentene, effect on ionizing radiation on, 275
Polypropylene, infrared determination of crystallinity, 545
  isotactic, kinetics of crystallization, 33, 107

Polystyrene, adsorption on carbon, 441
crystalline, preparation of, 259
Polyvinylidene bromide, unit cell dimensions, 270
Polyvinylidene chloride, unit cell dimensions, 270
Radiation, ionizing, effect on poly-1-pentene and poly-1-hexene, 275
Radical polymerization, of ethylene, 459
of ethylene, kinetics, 247
Sedimentation, cetyl pyridinium hyaluronate, 319
Sodium ethylenesulfonate, copolymers with *N*-vinylpyrrolidone, 274
Styrene, copolymerization with vinyl chloride, 543
polymerization with butadiene, 7
Synthesis, with triazines, 425
Tetrafluoroethylene, endgroups in, 289
Thermodynamics, non-electrolyte solutions, 329
Triallyl cyanurate, polymerization with polyester resins, 433
Triazines, in polymer synthesis, 425
Vinyl bromide, polymerization, 189
Vinyl chloride, copolymerization with styrene, 543
Vinyl ether, polymerization, 263
N-Vinylpyrrolidone, copolymers with sodium ethylenesulfonate, 274
Viscoelastic properties, of polyethylene, effect of crystallinity, 471
